The M19 form knurling tool is conceived for knurling on pieces with diameters between 3 and 100 mm .
(2) CLAMPING AND SETTING THE TOOL IN THE MACHINE

Clamp the tool to the turret of the lathe. While the chuck rotates very slowly, approach the tool to the workpiece until the knurl makes contact with the workpiece.
Approach the knurling wheel to the workpiece following the ' $F$ ' direction up until the teeth plunge a little into it. Check out the resulted print. The printed width (h) must be equal to the width of the teeth on the knurl. If the width isn't correct, change the clearance angle.

(3) KNURLING ON STEPPED WORKPIECES

When knurling stepped workpieces, it is not possible to knurl up to a shoulder.
Using this tool, no knurling should be performed closer to $0,5 \mathrm{~mm}$ from the shoulder itself.
(7) RECOMMENDED SETTINGS

| MATERIAL | $\begin{gathered} \varnothing \\ \text { wORKPIECE } \\ (\mathrm{mm}) \end{gathered}$ | $\begin{gathered} \varnothing \\ \text { KNURL(mm) } \end{gathered}$ | CUTTING SPEED (m/min) | RADIAL FEED (mm/rev) | TRAVERSE FEED (mm/rev) PITCH (mm) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | 0.3%.6 | 0.6\%1.2 | 1.2 $\div 1.6$ | 1.6 2.0 |

* Sometimes, it is not possible to increase radial feed or it just cannot be radially fed in the workpiece is too weak.
(6) TROUBLE SHOOTING

| PROBLEM | CAUSE | SOLUTION |
| :---: | :---: | :---: |
| Double knurling | Too slow radial feed at the beginning of the knurling | Increase radial feed at the beginning of the knurling* |
|  | The perimeter of the workpiece is not an exact multiple of the pitch | Turn a diameter so that the perimeter to be knurled is an exact multiple of the pitch* |
| Knurling wheels easily breakable | Knurling too deep | Reduce the depth to values according to the pitch |
| Knurling wheels wear out too fast | Knurling too deep | Reduce the depth to values according to the pitch |
|  | Working conditions are not adequate | Check cutting speed and traverse feeding speeds |
